

ERMA FIRST FIT BWTS

THE ESSENTIAL CHOICE FOR NEWBUILDS

ERMA FIRST FIT BWTS is an advanced modular system developed to exceed all special installation requirements for newbuild vessels.

The system's unique design enables straight-forward installation for projects with a reduced number of components, cables and pipes.

- Ease of installation, reduced installation costs, minimum system footprint
- Single mode of operation, covering all seawater qualities and conditions
- Most experienced Project Management & Designer team
- Optimized power efficiency, lowest OPEX
- Largest on-site commissioning & supervision teams
- The only AI integrated BWTS on the market
